

Cross-func initial task

Task description

Implement both test cases using one of the following technical stacks

Language	Automation tool	Testing library
Java	Selenium	TestNG
C#	Selenium	NUnit
JavaScript	webdriverio	Mocha + Chai
Python	Playwright	pytest

Task requirements:

1. Make sure that the autotests are working and stable
2. Follow the OOP principles and best practices where possible
3. Separate logic by using classes

Estimate: 10h

How to complete the task successfully (what do we expect):

1. The project is provided in the repository builds and runs without errors (only fails but caught site bugs are allowed)
2. The project implements all the steps correctly. There are all necessary steps implemented in the correct way, with no extra unnecessary steps.
3. The student met the estimate and deadline provided. Extra time could be provided only in case if it's requested before the deadline.

How to submit the task:

1. Create a pull request in your private repository
2. Attach a screenshot of an evidence of a test passing (showing green in IDE, for example, or test output in a console) as a comment in the same pull request
3. Request a review from <https://github.com/shinov42>

Task 1

Topics: Iframes + locators, findElement(), click(), getText(), isDisplayed(), back().

Test case

Preconditions:

- Go to <https://the-internet.herokuapp.com>

1	Click the <i>Frames</i> link	
2	Click the <i>Nested Frames</i> link	The middle frame text is 'MIDDLE'
3		The left frame text is 'LEFT'
4	Go back to the previous page using browser navigation	The <i>Nested Frames</i> link is displayed

Task 2

Topics: Expicit wait + ChromeOptions, locators, findElement(), JS Executer, click(), the page is displayed, isDisplayed(), refresh(), findElements()/try-catch.

Test case

Preconditions:

- The browser should be open in incognito mode.
- Go to<https://demoqa.com>

1	Click on the <i>Widgets</i> card	
2	Select the <i>Progress Bar</i> option from the left menu	The <i>Progress Bar</i> page is displayed
3	Click on the <i>Start</i> button	The <i>Reset</i> button is displayed
4	Refresh the page	The <i>Reset</i> button is not displayed
